

Roebbelen

50 Years of Making A Difference 1959 - 2009

It all began in 1959 with the leadership of Hans and Alma Roebbelen. From its humble beginnings, Roebbelen has now grown to about 400 employees and six owners. Specializing in commercial, institutional and industrial projects, the company provides general contracting, construction management, design build and value analysis

of excellence, trust and dependability, the El Dorado Hills-based company has created many types of innovative buildings and is an alliance contractor for one of the largest telecom companies in the United States. Since 1998 they have completed over 6,000 projects for the telecom industry and in 2006 Engineering News Record Magazine (ENR) ranked Roebbelen #10 in the nation in telecom construction. Roebbelen recently opened a special projects division to provide small and large project services for property owners and managers.

One of Roebbelen's recent projects is the construction of Antelope High School. A 40-acre site with 173,000 square feet of buildings, this campus includes career and technical education programs for trades. Its classrooms are networked to the district office, which provides instant communications throughout the District.

Roebbelen also built Creekview Ranch Middle School, the first "green" school in the Dry Creek JESD. Built to LEED Gold Standards, this school was designed to provide better classroom acoustics, energy-

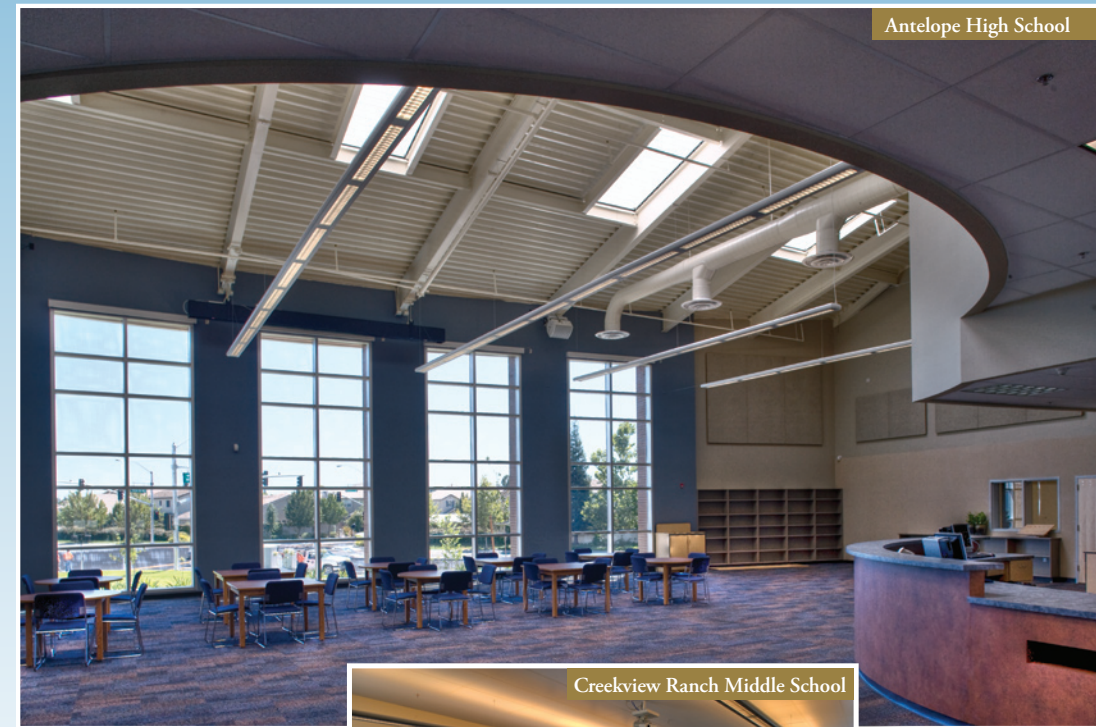

efficient lighting and a healthier environment. It will be one of the first middle schools in California to obtain LEED Gold certification.

The business has earned quite a list of prestigious awards since its inception. It was recently honored to receive "Project of the Year" for the Sacramento County Fleet Maintenance Facility by the Sacramento Chapter of the American Public Works Association under the Structures category for a large public works agency between \$10-50 million. Last year, Dougherty Valley High School was selected Best of California in the K-12 category for Northern California, by California Construction Magazine. This year, Roebbelen won both the Western Council of Construction Consumer's (WCCC) Distinguished Project Award and their Exceptional Project Award. In addition they have won the Distinguished Project Award consecutively for the last six years from 2003 - 2008. Roebbelen's quality has made a difference and it is consistently recognized by their many awards.

Most importantly, Roebbelen truly cares about people and believes in making a difference

in the communities in which they do business. It's reflected in their core values and philanthropic contributions to our community. Their employees have helped the Grace Foundation and have generously contributed to numerous children's charities. In addition, they do two extensive community service projects a year. Plus, they give time and materials to the Sacramento Children's Home and encourage managers to serve on local charitable boards.

As they celebrate an important milestone, Roebbelen is grateful to all of their clients, employees and friends. "You have helped us reach 50 Years and we could not have done it without you," said Roebbelen President Terry Street. "Thank you for helping us make a difference!" The company is driven to build exceptional projects, enduring relationships and the most respected workforce in the

construction industry. In fact, at Roebbelen, they're building excellence every day. They're excited to continue their purpose and look forward to making a difference for another 50 years.
